

# CLOUD APPLICATION BACKUP

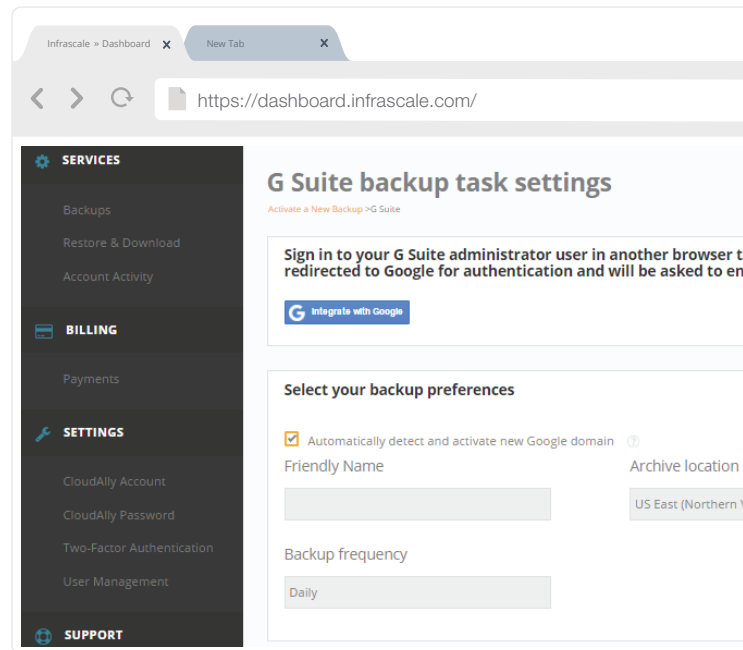

Backup, manage and recover all your Cloud data in one place. Cloud Application Backup is a cloud-to-cloud backup and recovery solution, which backs up daily changes in Google G Suite applications to our unlimited cloud and makes it available for restore or export with a single click.

## G Suite

More than 3 million businesses now trust their data with G Suite to collaborate smartly and securely in the cloud. But, there's business risk when you're trusting one vendor with so much of your mission-critical data. Unfortunately, Google only keeps deleted items – such as emails, sheets, and contacts – for 30 days. This means that you can't retrieve important information caused by accidental or intentional deletion.

### Infrascale's Cloud Application Backup lets you:

- Quickly recover data from any disaster
- Keep a secure, second copy of your data in a separate cloud
- Retain your data beyond Google's 30-day retention policy
- Manage multiple domains from a single Infrascale account
- Protect all of your Google data including Mail, Drive, Calendar, Contacts, Tasks and Chats

## FEATURES & BENEFITS

### Set it & Forget It

Protect frequently changing business data, so it can be restored quickly and easily in the event of data loss or corruption.

### Protect All of Your Data

Backup all of your data across Google's wide range of apps, including Mail, Drive (excludes Google Photos), Classic Sites, Calendar, Contacts, Tasks and Chats.

### Stay in the Loop

We'll send you a daily report that includes both an overview and a more extensive summary of your backup activity.

### Restore with Ease

Drill down through backups by date or keyword search to quickly locate and recover individual items, or restore an entire mailbox, calendar.

### Long Term Retention

Stay in compliance and ensure your organization has unlimited storage and unlimited retention of your daily archives.

### Geographic Coverage

Your data is securely archived within the US (default), or optionally to the EU or Australia.

### Your Safety Deposit Box

Keep your Google cloud data safe from all forms of harm, inappropriate behavior and loss — quickly, easily and above all, securely.

### Data Export

Easily export your data as a zip download containing industry standard EML, VCF and ICS formats, or Outlook compatible PST formats.

Price/Month

\$2.50/mailbox/month (one year commitment required)
